Deployment

What is Deployment?

- After building and evaluating the model, we make it available for real users.
- This stage is called Deployment.
- The AI model is now used in real-world situations.

Why is Deployment Important?

- ✓ Makes AI useful in real life.
- ✓ Solves actual problems.
- ✓ Helps users make decisions.
- ✓ Provides real-time predictions.

Without deployment, the model remains only a project.

What Happens During Deployment?

- The trained model is integrated into an application.
- Users can interact with the system.
- Predictions are generated in real time.
- Feedback can be collected.

Real-World Implementation

- Real-World Implementation means:
- Using the AI model in practical situations to solve real problems.
- Example Areas:
 - Education – Performance prediction systems
 - Healthcare – Disease detection systems
 - Banking – Fraud detection
 - Transportation – Traffic prediction

Example – Spam Detection System

- Before Deployment:
 - Model trained on thousands of emails
- After Deployment:
 - Integrated into email service
 - Automatically detects spam
 - Moves spam emails to spam folder
- Now it works in real life.

Example – Student Performance Model

- Before Deployment:
 - Model trained using attendance & marks
- After Deployment:
 - Used by school system
 - Predicts students needing extra support
 - Helps teachers take action

Monitoring After Deployment

Deployment is not the end.

- Model performance must be monitored
- Data may change over time
- Model may need retraining

Continuous improvement is important.

Challenges in Deployment

- ! Data privacy issues
- ! Ethical concerns
- ! Bias in predictions
- ! Technical errors

Responsible AI practices must be followed.

Key Takeaways

- ✓ Deployment is the final stage of AI Project Cycle.
- ✓ It makes the AI model usable in real-world situations.
- ✓ Model is integrated into applications or systems.
- ✓ Continuous monitoring and improvement are required.

A top-down view of a desk with a light blue background. In the top left, a silver laptop is partially visible. Next to it is a white computer mouse. Below the mouse, a pair of tortoiseshell glasses lies on the surface. In the bottom left corner, there is a dark brown leather notebook with a white pen tucked into its side.
